

POLYCARBONATE FLOOR REGISTERS (VENTS)

Manufactured from fire retardant, V-2 polycarbonate plastic, the Poly Floor Vent from Westaflex has been designed and built to withstand the traffic area pressures in today's homes.

Poly Floor Vents are available in 11 designer colours to suit most floor coverings in today's décor. It doesn't matter if it is carpet, polished floor boards, tiles or lino, there is a colour to suit your needs.

Poly Floor Vents are available in two different styles and sizes. Side way blow is the most popular model, although where curtains get in the way of the vent or where it is placed next to a cabinet, television or fixture, the unique front way blow may be the better option. Using the front way blow also eliminates the need for easily damaged air deflections or pop up vents that sit up above the floor level.
